

FBW3: Re-Intro 😊

# Introductions

Discussion: Previous course structure

# Moving forward: Some basics

1. Collaborative live-coding
  - a. Install Liveshare extension on VS Code and sign in with your github account (demo)

# Moving forward: Some basics

## 1. Collaborative live-coding

- a. Install Liveshare extension on VS Code and sign in with your github account (demo)

## 2. Github organisation titled [DCI-lei-Fbw3](#) for the course

- a. Everyone sends their github associated email addresses to Taimur on slack
- b. Repository structure:
  - i. Each module will have a directory of sub-modules. Each sub-module directory will contain a directory for the days spent (for example B\_2\_UI-Basics→ 01\_Boilerplate→ 24.09.20: <keyword>→ all resources for this day)

# Moving forward: Some basics

1. Collaborative live-coding
  - a. Install Liveshare extension on VS Code and sign in with your github account (demo)
2. Github organisation titled [DCI-lei-Fbw3](#) for the course (Github Classroom?)
  - a. Everyone sends their github associated email addresses to Taimur on slack
  - b. Repository structure:
    - i. Each module will have a directory of sub-modules. Each sub-module directory will contain a directory for the days spent (for example B\_2\_UI-Basics→ 01\_Boilerplate→ 24.09.20→ all resources for this day)
3. Use the resources (Class Rep, TA, Github Studentpack etc.)

5. Of course, if there are any questions/concerns/issues, then please reach out!

## A | Preparatory

1

BDL - Basic Digital Literacy

WebDev  
v.2

## B | Basics

2

UIB - UI Basic

3

PB - Programming Basic

## C | Environments

4

Browser

5

Node

## D | Implementation

6

SPA - Single Page  
Application

7

DS - Data Server

8

FS - Fullstack Server

Final Project

# The Big Overview

<https://coggle.it/diagram/XpxWaRqrZHPxD7mO/t/overview-of-the-fullstack-ecosystem/bb6c49bd08a24cae65dc875f08d1f00da76e3cd08eb9364f3f02330b0f19d58e>

# Monthly DCI Student Survey

Meeting in Leipzig w/Bianca?
